

JACKMAN WHEELS • CONTENT AND SOCIAL • V1

SOCIAL PLAYBOOK

The standing rules, and the dated list that runs from today through year end. Companion to the strategy document — that one is the why, this one is the what and when.

INSTAGRAM	FACEBOOK	DEALERS	APPROVAL
760 followers	15 followers	25 in progress	None full creative authority

18

days to Off-Road Expo — October 3–4, OC Fair & Event Center, Costa Mesa

The venue moved from Pomona. Everything before it builds toward it; everything after it harvests from it.

Part 1 THE RULES

These don't change week to week. Everything in Part 2 is subject to them. Numbered so they can be cited — "that breaks rule 11" should be a sentence anyone here can say.

A · NEVER SHIPS

- 01

No founding decade or year.
The homepage says 1960s, Our Story says mid-1970s. Until that's settled: "California-born," "born in a California garage," "founded by Harry and Sheryl Jackman."
- 02

No load rating, certification, torque value, or strength claim.
No JWL, VIA, SAE or TÜV. None of it is published, and a revived brand cannot absorb one wheel-failure story.

03 Never "lifetime warranty" unqualified, never any implication of coverage off-road.

Approved: "Limited lifetime structural warranty and a five-year finish warranty — see full terms." Always linked.

04 ™ on exactly three names, first use only.

Radial Flow Form™ (R-FF™), Reverse Draft Technology™, Dual Vector Retention™ (DV-RET™). Never on Enhanced Bead Retention, Fixed Cap Orientation, or Water Relief Channels. Never verb or pluralize a mark.

05 R-FF™ copy comes from the corrected v2 page and nowhere else.

The story is porosity closure and fragmented silicon. Never grain-fiber language, never a weight percentage, never "same as flow forming," never a comparison that disparages our own cast line.

06 No rendered or comped wheels presented as photography.

Real installs only. Comps live in openly stylized graphic treatments, or nowhere.

07 Never grade a finish toward what we wish it looked like.

Finish accuracy is a returns issue, not an aesthetic preference.

08 Classic 68 keeps its name.

Never "J68" in copy, whatever the filenames say.

09 Fitment questions get "confirm with your dealer."

Never a spec from memory, in any comment, on any platform.

10 Never tag a vehicle manufacturer.

It implies a relationship we don't have.

B · OTHER PEOPLE'S CONTENT**11 UGC in the grid is a Collab, or it goes in Stories.**

Never download and re-upload. This is the whole answer to the April 2026 originality rule, and it's free.

12 Written permission first, screenshotted, filed.

04 UGC and Permissions. A fire emoji in the comments is not a license.

13 Credit the photographer and the owner by handle in the first two lines.

14 Never crop out a competitor's product to make a shot usable.

Either the shot works or it doesn't.

C · FORMAT AND CRAFT

15 Every Reel starts as a Trial Reel.

Non-followers only, 72 hours. At 760 followers there is no reason to ever publish a Reel cold.

16 No sale or promo graphics as feed posts.

Empirically the worst format in the category — Method's promo reel pulled 4,536 views against a 3.9M best. Promotion goes in Stories, email, and dealer pages.

17 Shoot for the slot.

4:5 feed, 9:16 vertical. Never crop one into the other.

18 First line is a claim, a number, or a question.

Never a greeting, never the brand name. "Fixed Cap Orientation means the logo sits level every time," not "Introducing the new J72!"

19 Five to ten hashtags.

Two brand, two or three category, two or three culture tags matching the vehicle actually in frame. Never tag a vehicle-culture hashtag for a rig that isn't in the photo — that community notices instantly.

20 Bronze type never on a graphite panel.

2.87:1. It fails by looking fine on your monitor and vanishing on a phone in daylight. Warning text in bone white, never signal red on black.

D · RHYTHM

21 One job per post

Reach, convert, de-risk, or hold. A post doing two does neither.

22 Answer every comment within a few hours.

On Facebook this is not service, it's distribution — an active thread keeps a post circulating for days.

23 Sustainable beats heroic.

Three weeks of five-a-day followed by silence is the fastest way to look like a brand in trouble.

E · THE PAID TRIGGER — A RULE, NOT A DATE

24 Boost nothing. Run winners.

Paid does not rescue unproven creative; it scales proven creative. A Trial Reel that performs with cold non-followers *is* your ad creative, already validated for free. Nothing goes behind spend until organic has identified it.

25 Facebook is the exception.

It will not grow from 15 followers organically — there is no seed audience for the algorithm to expand. Your two unlocks are dealers and paid. Until one of them lands, Facebook gets built correctly and left alone.

Part 2 THE RUN SHEET

Bronze markers are the items that carry real weight. Everything else can slip a week without much cost.

WEEK 0 • SEP 14-20 FOUNDATION AND THE SHOOT

Nothing ships until the accounts are set up properly. A good post landing on a broken profile is wasted.

ACCOUNT SETUP — BEFORE ANY CONTENT

☐ Rewrite the Instagram bio.

What we make, who it's for, where to buy, California. No founding year.

☒ Build Story Highlight containers by vehicle platform.

Sierra/Silverado · Tacoma · 4Runner · Gladiator/JK-JL · Bronco · F-150/Super Duty · Ram · Overland. Empty for now. Method organizes this way and it's correct — a buyer knows their truck, not your model numbers. Vossen sorts by product series, which is a menu in a language the customer hasn't learned.

☐ Facebook page audit.

Proper business page, About filled, Shop tab, reviews enabled, Events enabled.

☐ Link Instagram and Facebook in Meta Business Suite.

Required for cross-posting now and ads later.

☐ Connect the Shopify catalog to Meta Commerce.

Feed titles must match PDP titles exactly or catalog matching breaks.

☐ Create the Instagram Series containers

One for *How We Got There*, one for *How It's Built*.

WED SEP 16 — THE AT4 SHOOT

☒ Shoot to the field list.

The three-light finish sequence is the one thing that cannot be recreated later.

☐ Grab landscape plates with the truck

B-roll bank for *How We Got There*. Cheap on a day you're already out there.

☐ Written permission and the owner's handle before you leave

If the AT4 isn't yours.

THU SEP 17 — SUN SEP 20 — CUT AND BANK

☐ Cull to 6 hero stills, 2 carousels, 6 Reels.

- ☒ **Write three weeks of captions in one sitting.**
Batching is the only thing that survives a busy month.

- ☐ **First Trial Reel out.**
Suggested: the finish-in-three-lights piece, opening on a plain claim.

WEEK 1 • SEP 21-27

PARTNERSHIPS, BECAUSE THEY OUTWEIGH THE FEED

This is the priority week and the feed can coast on banked content. A Collab post publishes to both audiences and counts as original for both — one Collab with Nitto reaches more people than a year of posting alone at 760 followers.

- ☒ **Email Skyler House, Baja Designs and Nitto with a specific ask.**
Not a vague partnership — a Collab post and a shared shoot. Concrete, dated, low-commitment.

- ☒ **Pitch the three-brand build.**
One truck: Jackman wheels, Nitto tires, Baja Designs lights. One shoot, one Collab, three audiences, original for all three. Highest-leverage asset available to us and it costs one day.

- ☐ **Confirm who's at Off-Road Expo and book time with them there.**

- ☐ **Begin the weekly posting rhythm.**

- ☐ **Start group participation as a person, not the page.**
Sierra/AT4, Tacoma, Gladiator, Bronco, overland — plus vintage VW and desert racing. Roughly twenty helpful contributions before one that mentions product.

SUPPORTING THE SALES TEAM — SMALL TASKS, OUTSIZED RETURN

- ☐ **Fix "DOWNLOAD MPL" on the dealer resources page.**
It currently links to the logo ZIP.

- ☐ **Fix the dead "SEE GUIDELINES" link.**
A dealer who clicks and gets nothing has already formed an opinion about our operational maturity, and two people are out there selling against that impression.

WEEK 2 • SEP 28 - OCT 2 **EXPO RUN-UP**

- ☐ **Create the Facebook Event for Off-Road Expo.**
Events are one of the few Facebook surfaces that still work from a standing start.
- ☐ **Three "where to find us" posts across the week, Stories-weighted.**
- ☐ **Booth graphics and printed collateral finalized.**
- ☐ **Build the expo shot plan.**
It's a content harvest, not a trade show.
- ☐ **Pre-write expo caption templates**
So you're not writing copy in a parking lot.

SAT-SUN • OCT 3-4 **OFF-ROAD EXPO, COSTA MESA**

The single best content and Collab day of your year. Treat the booth as a studio that customers walk into.

- ☒ **Shoot every rig that stops.**
Each one is a potential Collab and a potential *How It's Built* subject.
- ☒ **Collect handles and written permission on the spot.**
A phone note with the handle plus a permission screenshot is enough.
- ☐ **Get Skyler House, Baja Designs and Nitto on camera or in frame.**
- ☐ **Meet any of the 25 in-progress dealers who are attending.**
Faces on the sales pipeline.
- ☒ **Post to Stories live. Nothing to feed.**
Feed content rolls out over the following two weeks — that's how one weekend becomes a month of posts.

OCT 5 - NOV HARVEST, AND LAUNCH THE CHEAPER SERIES

☐ **Roll out expo content across two weeks.**

☐ **Convert expo contacts into Collabs — one per week minimum.**

☒ **Launch *How It's Built* first.**

The smarter opener: other people's vehicles, so it's cheap; a Collab by nature, so it borrows audiences; and it doesn't wait on a trip, a season, or the onX conversation. *How We Got There* is the bigger idea and the better email engine, but it's gated on things outside your control.

☒ **Second on-vehicle shoot — J72 on a real truck.**

It's your expected high mover and right now you have no on-vehicle content for it.

☐ **Build the email capture flow for the route download**

Before episode one needs it, not after.

☐ **First dealer content kit.**

Four ready-to-post assets, captions written, one line left blank for the dealer's own name. Ships the month the first dealers sign.

NOV - DEC HOW WE GOT THERE, AND PAID

☐ **Sand Hollow shoot and episode one build.**

☐ **Resolve the onX file format question.**

If onX stays quiet, ship the route as a plain GPX and name onX as the recommended app anyway. Don't let an unanswered email gate your best format.

☒ **Turn paid on, using Trial Reel winners as the creative.**

By now you'll have eight to twelve weeks of cold-audience data and you'll know exactly which three pieces deserve budget.

☐ **Facebook goes live properly**

Once dealers or paid provide a seed audience.

Part 3

THE STANDING WEEKLY RHYTHM

WEEK IN, WEEK OUT

DAY	INSTAGRAM	FACEBOOK
MON	Reel — Branding (Trial first)	—
TUE	Carousel — Technical · Proof	—
WED	Collab — Partnerships	Reel re-export + comment sweep
THU	Carousel or Reel — Technical · Mechanism	Heritage or dealer post
FRI	Still 4:5 — Branding	Event / local / build
DAILY	4–7 Stories across the week	—

Part 4

WHAT WE MEASURE

Tied to what you're actually accountable for: awareness, clicks, conversion, and demonstrable partnerships.

METRIC	WHERE	WHY THIS ONE
Sends per reach	IG insights	The signal that actually drives unconnected reach. Method's breakouts were sendable; their pretty trucks weren't.
% unconnected reach	IG insights	At 760 followers this is the only reach that exists. If it isn't the overwhelming majority, nothing is working.
Trial → live rate	Manual log	Your creative hit rate, and it becomes the paid shortlist for free.
Clicks and sessions	GA / Shopify	The awareness-to-site number you're measured on.
Email captures	Klaviyo	The only audience Meta can't throttle. The real long-term asset.
Collabs per month	Manual	Direct proxy for "showing good partnerships," and the fastest borrowed reach available.
Dealer kit adoption	Manual	How many dealers actually posted. Supports the sales team without owning their number.
Not measured	—	Follower count on its own. Likes.

THE RECORD IS THE ARGUMENT

One filled-in monthly template in 10 Analytics and Insights becomes a twelve-month record. When you ask for budget in January, that record is the entire case.

Part 5PRE-FLIGHT, EVERY POST

- 01Which of the four jobs is this doing? (One.)
- 02Would someone send this to a friend?
- 03UGC in the grid — Collab, and permission filed?

04 Any number, spec, rating or certification that isn't published? Then it comes out.

05 ™ correct on first use — the three marks only?

06 Founding decade mentioned? Then it comes out.

07 "Lifetime warranty" unqualified, or any implication of off-road coverage? Then it comes out.

08 Bronze type on graphite?

09 Run `scripts/brand_check.py` on the caption.
